

Launch of 150 Day Advocacy Campaign

A Home for Every Neighbour

Today

- Housing is treated as an investment - not a human right.
- More houses are being built - yet prices keep rising.
- Women over 55 are the fastest growing group facing homelessness.
- Families with young children are being forced into housing insecurity.

Do we believe every person deserves a home?

Of course we do.

Do we want to do something about the high cost of housing?

Undeniably.

Should home ownership be possible for younger Australians?

Unquestionably.

We Believe

A FAIR TAX SYSTEM CAN SUPPORT FAIR HOUSING.

PEOPLE MATTER MORE THAN PROFIT.

HOUSING IS A HUMAN RIGHT.

Scan the QR code above for more information and to register

1. **To reform the taxation system: Fix capital gains tax and negative gearing, and ensure big corporations and the wealthiest Australians pay their fair share.**
2. **To urgently increase the amount of public (social) housing in this country.**
3. **To provide additional support to women over 55 and families with children.**
